

## GameChange Solar Commissions 42 MW 2P Trackers in Snowy Michigan, USA

23 Jun 2021

**GameChange Solar** announced that the company has commissioned a group of tracker projects totaling 42 MW. The system utilized was the 2 Portrait Genius Tracker. Michigan has snow loads up to 50psf and GameChange Solar's sturdy systems are engineered to withstand these heavy snow loads as well as high wind speeds.

### GameChange Solar Commissions 42 MW 2P Trackers in Snowy Michigan, USA

Derick Botha, Chief Commercial Officer at GameChange Solar, stated: "We are seeing widespread adoption of our 2 Portrait configuration of the Genius Tracker in areas where sites have land constraints or difficult post driving conditions. We see the 2 Portrait tracker as a strong market contender and are glad to be able to service our customers with a well-engineered and cost-effective solution."
