2016 Top Solar Mounting Products

What follows are the Top Solar Mounting Products for 2016. From flat roof, sloped roof, ground-mount, tracking and carport designs, the mounting category is our most popular. We have unique ballasted solutions, rail-less designs and complete pallet systems. Take a look at this year's innovative products within racking and mounting.

Ground

Ballast Block

Ballast Block is a customizable, flexible racking solution with multiple foundation options designed for flat and slightly pitched ground-mount solar projects. The Space Mount racking system allows for up to 14 panels per acre, maximizing installation while reducing project costs. Ballast Block has the industry's first "no change order" price guarantee.

GameChange Solar Pour-in-Place Ballasted Ground System

GameChange's Pour-in-Place Ballasted Ground System is the fastest installing ballasted ground system with self-leveling technology. Industry's longest spans and fewest foundations. Substantial labor savings by eliminating moving and shimming heavy, precast blocks. Patent-pending articulating purlin connections to navigate up to 15% terrain slopes. Supports all modules. Integrated grounding and wire management.

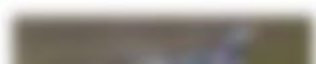

Space Mount Solar Energy Storage Foundation

The Energy Storage Foundation is a revolutionary low-cost ground-mount structure and engineered and easily installed for general use. No heavy equipment. No piles or foundations. No concrete. Made of galvanized steel, proprietary modular units assemble easily, allowing to minimize and scale from one to thousands. Complete solar installation and O&M ready.

MR Solar Next Generation Ground Mount Solution

Utility and commercial ground-mount solar projects, with sustainable investments, are frequently associated with high upfront costs. To combat this hurdle, MR Solar developed a solution to make ground-mount solar installation more affordable for utility scale and commercial projects. The next generation ground-mount solution can be used with increasing system strength.
